PERMANENT METAL AIR FILTER

Heavy duty washable filter are manufactured in Aluminum, Galvanized Steel and Stainless Steel. Available in depths of 1/8" to 4". Standard and special sizes available. These filters are designed for years of effective use. Smith Filter recommends the use of Filter Spray Adhesive when using permanent mesh filters in an air application.

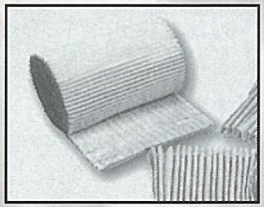
PERMANENT METAL GREASE FILTERS

Unique roll formed baffles are designed to prevent flame from penetrating through the filter, into the duct work. UL Approved for Grease, this 2" Grease Filter comes in Aluminum, Galvanized Steel and Stainless Steel. The 1" baffle is available in Galvanized Steel only.

FIBERGLASS AND POLY PANEL FILTERS

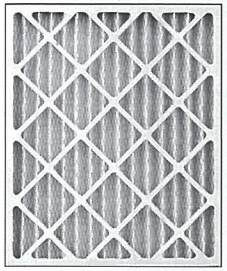
Stock size fiberglass and polyester panel filters have special features including a good quality frame and media. Specials filters use high quality media with a heavy chipboard frame and bottlecap on the air leaving side of the filter. (Larger filters have multiple layers of bottlecap).

PLEATED MEDIA



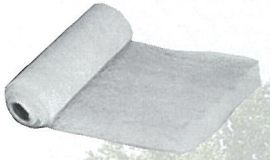
Smith Filter sells pleated media in both pads and rolls, 1" and 2" depths. Figured by number of pleats per foot, rolls available in 16", 20" and 25" widths. Pads available in a variety of sizes.

SMITH FILTER CORPORATION



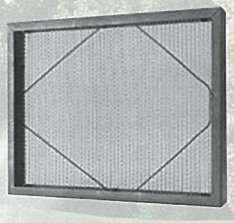
PLEATED FILTERS

Available in both standard capacity (SEP) and high capacity (SDP). All sizes available in 1", 2" and 4" depths. This extended surface series is produced with a high quality pleated media and a solid Kraft Board frame which has an excellent moisture resistance quality. Available in both stock and special sizes.



FIBERGLASS & POLYESTER MEDIA: BULK ROLLS AND PADS

Fiberglass media is made of 100% continuous filaments of spun glass, bonded with a thermosetting resin. This assures deep dirt penetration and high dust holding capacity. Polyester available in dry and tackified pad and rolls.



SMITH S-76 PAD HOLDING FRAME

Save money, storage and labor costs. Permanent pad holding frames are made with 24 gauge Galvanized Steel. 1 x 1 wire supports the multiple medias that can be used in the S-76 Pad Holding Frame. Cross Wires and Hinged Gates available and sold separately.

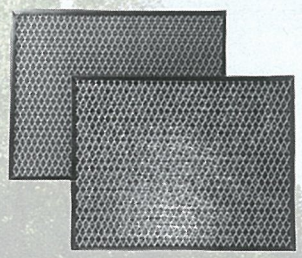
YOUR FULL LINE AIR AND GREASE FILTER MANUFACTURER

NS-50 and NS-100 HOLDING FRAMES

Heavy 16 gauge Galvanized Steel makes up these filter holding frames. Designed to provide a strong, durable vibrationless filter bank, simple and economical to erect. NS-50's have a straight side for single or small bank applications. NS-100's have an interlocking lip; designed for larger filter banks.

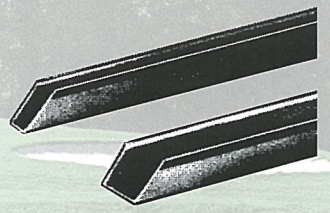
PERM-A-FOAM FILTERS

An Aluminum filter, designed for furnace applications, this filter has 1/8" Scott Foam, corrugated between two layers of expanded aluminum, and enclosed in a heavy aluminum frame. This filter is washable, designed to last through multiple cleanings. Available in filters, pads and rolls. FOAM FILTERS are also available at Smith Filter.



ELECTROSTATIC AIR FILTERS

A low resistance Electrostatic filter that meets manufacturer specifications for low initial resistance to air flow. A combination of woven polypropylene and unique high loft polypropylene, enclosed in a 1" metal frame.



CHANNEL

A large variety of Channel is available in Aluminum, Galvanized Steel and Stainless Steel, in multiple lengths, widths and types. Make up filters with customized media to save shipping costs as well as labor costs.
