Your channel needs are "in the bag" with *Smith Filter*

Media available at Smith Filter:

Bonded Aluminum (Fits Material)
Available in 1/4" and 5/8" widths, this light weight Aluminum material is easily cut to size to make up custom sized filters. Available in both pads and rolls. (standard roll 50').

Perm-A-Foam
Smith manufactures a pad that consists of 1/8" foam corrugated between two layers of expanded aluminum mesh. The perfect permanent solution for making up filters for most furnaces and air handling units. Easy to work with, this media comes in both pads and rolls. (standard roll 25').

Expanded Media
Smith expands it's own material, including Aluminum, Galvanized Steel and Stainless Steel. Available flat, or corrugated, depending upon your needs. Available in both pads and rolls. (standard rolls 50').

Foam
Available in 1/8", l/4", l/2", 1" and 2" thicknesses, the Smith Foam is easy to work with and handles well in filter assembly. In combination with the expanded media, this filter pad is very versatile in multiple applications.

Hog Hair
Self Supporting pad manufactured with fine interconnected natural fibers, spun into a high loft, depth loading, fiber maze. Easily cut with shears or a paper cutter. Available in pads and rolls.

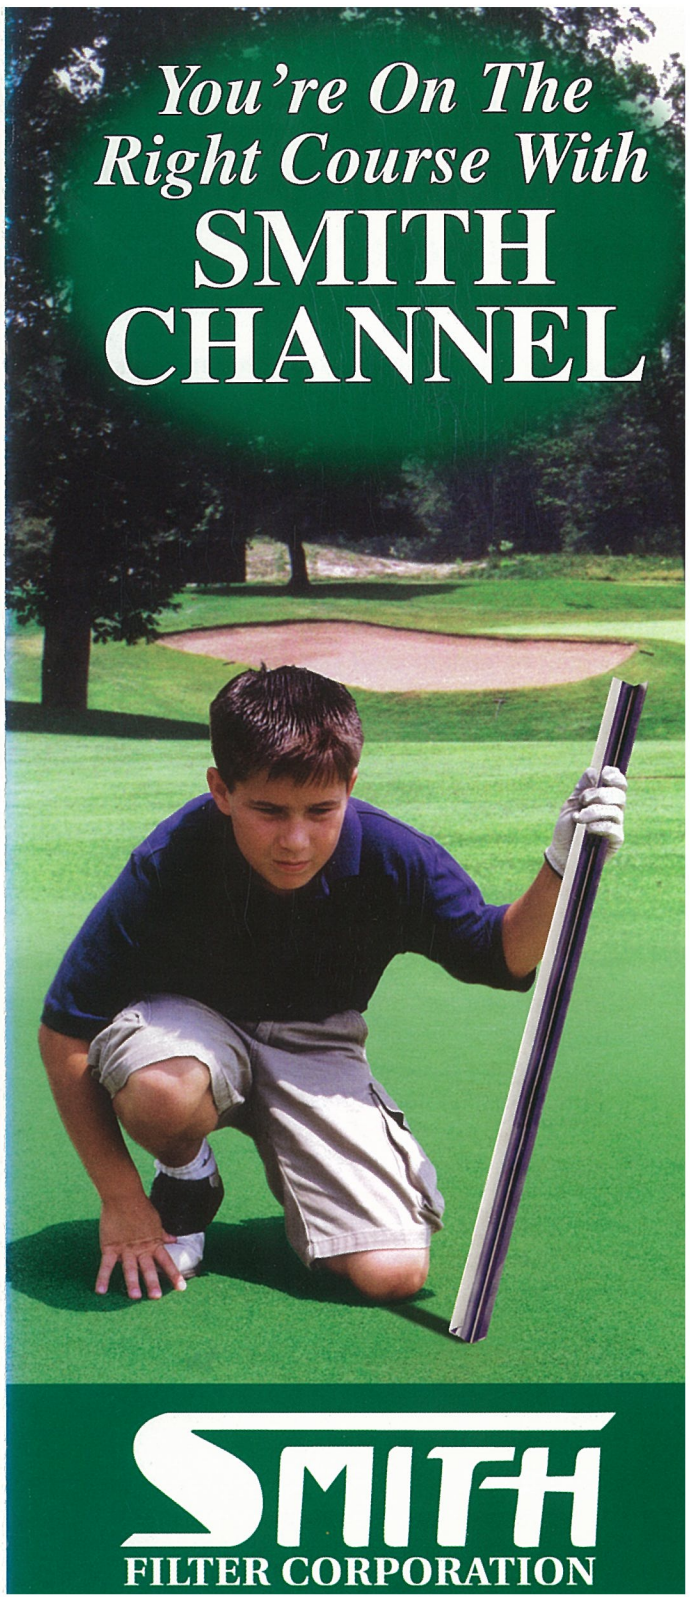
You're On The Right Course With SMITH CHANNEL



SMITH
FILTER CORPORATION

We have purchased a large number of roll formers, giving us the ability to offer the largest variety of channel ever!

Being a full line Air and Grease filter manufacturer, we strive to offer a wide variety of products that fit in these categories. When this opportunity came up to expand our channel line, we felt it would definitely be a benefit to our customers. With this machinery, we are able to offer a greater variety of widths, lengths and types of channel. With our enlarged department, we feel we can offer you even more than what we were able to before.

We would be glad to send you samples of the channel you currently use, or may use in the future. Please contact us regarding your needs and we would gladly get these samples right out.

With Smith Filter, you are given the choice of either making up your own filters with the individual filter components or having us manufacture the filter for you.
